

Projects completed in Luxembourg

Chambre de Métiers

The Chambre de Métiers roundabout in plateau de Kirchberg in Luxembourg city was planted with *Quercus robur* 'Fastigiata Van den Berk'. We developed this cultivar to be particularly narrow. This makes it ideal for a great number of locations, including the Chambre de métiers roundabout. We can supply many other cultivars of the *Quercus robur* in addition to the 'Fastigiata Van den Berk'.

Place de la Constitution

The wonderful panorama at the Place de la Constitution in Luxembourg city attracts a great many tourists. A row of trained *Pyrus calleryana* 'Chanticleer' was planted here two years ago.

The changes that take place over the seasons combined with the constantly changing undergrowth creates wonderful variations in the appearance of the street.

Pyrus calleryana 'Chanticleer'

(Place de la Constitution)

Height	8 - 12 m
Crown	narrow conical to ovoid
Bark and branches	old bark is rough and flaky
Leaf	oval to broad oval, glossy green, 4 - 10 cm
