

Waterplein, Drachten

Van den Berk Nurseries supplied the multi-trunked *Liquidambar styraciflua* for the Waterplein in Drachten.

Slot Haverleij, 's-Hertogenbosch

Several years ago, the municipality of 's-Hertogenbosch started a unique project. One thousand houses and apartments were grouped in Slot Haverleij and 9 other castles in an area covering 225 hectares. What is striking is that only 10% of the total surface area has been built on. There is even space for a professional golf course, so this really is 'living in the green'. Van den Berk Nurseries supplied a large number of trees, including 250 *Salix alba* for the driveway of Castle Wuyvenhaerd and *Platanus acerifolia* for a courtyard in Castle Haverleij.
