

“Absolutely the standard”

Mr Ronald Houtman, freelance publicist and range consultant on 'Van den Berk on Trees'.

“It is still the standard work in this field. I and many of my colleagues in the nursery and horticultural sector use it regularly. Simply because of its completeness. It is extremely convenient to have so much information on trees in a single book, and no other book contains so many accompanying photos. 'Van den Berk on Trees' is absolutely the standard.”
