

Van den Berk Rhododendron GmbH Rastede, Germany

Production manager Arnold Claußen

“I will not give everything away, but each spring we break open all the buds on the plants that are not yet on sale. This creates beautiful, full plants” (Arnold Claußen)

Rhododendrons and azaleas

“Welcome to Van den Berk Rhododendron GmbH! Our nursery is specialised in extremely large rhododendrons and azaleas in sizes exceeding four metres and also large quantities of plants in almost every size. We have a gigantically deep and wide range with more than 250 types and varieties, including many plants

that are inoculated on the special Inkarho (lime tolerant) lower trunk. The secret of our famous dense and full rhododendrons? I will not give everything away, but each spring we break open the buds on the plants that are not yet on sale. This creates beautiful, full plants.”
