A column-shaped selection with a remarkably straight main stem and open branching. 'Tremonia' is slow-growing, especially when young, and remains very narrow, even when mature. Height 10 - 12 m. Width to approx. 5 m. The fan-shaped leaves and flower buds are on short shoots. The leaves grow in bundles of 3 - 5 together and have an incised top. Adding decorative value is the golden yellow colour this tree turns in autumn. 'Tremonia' is a male type that is excellently suited as a street tree, thanks to its lack of fruit. Its narrow crown renders it suitable for small gardens, as well. Requires a site with ample light. Winter hardiness zone: 5a
