

Acer platanoides 'Palmatifidum'

Height	8-10 m, slow growing
Width	6-8m
Crown	ovoid / egg-shaped, half-open crown
Bark and branches	grey
Leaf	green
Flowers	yellowgreen, flowers in April
Fruits	brown, inconspicuous
Spines/thorns	None
Toxicity	has toxic components
Soil type	clayed soil, loamy soil, sandy soil
Soil moisture	withstand short flood
Paving	tolerates no paving
Winter hardiness zone	4 (-34,4 to -28,9 °C)
Wind resistance	not very sensitive, not resistant to sea wind
Other resistances	resistant to frost (WH 1 - 6)
Fauna tree	resistant to frost (WH 1 - 6), valuable for butterflies
Application	avenues and broad streets
Shape	clearstem tree
Synonyms	Acer platanoides 'Lorbergii'

Acer platanoides 'Palmatifidum' (syn: A. platanoidus 'Lorbergii') is a small tree, with a slightly twisted growth habit, reaching a height of circa 10 m. It has a round to egg-shaped crown and is a slow grower. The tree has beautiful, deeply cut, green leaves and rarely bears flowers and fruits. 'Palmatifidum' is used as a park tree and a solitary. It demands little of the soil, but does not tolerate peaty or wet soils. The tree is good wind resistant. Winter hardiness zone: 4
