

Acer rubrum 'Bowhall'

Height	12-15 m
Width	5-8m
Crown	narrow conical, dark, dense crown
Bark and branches	grey
Leaf	green
Autumn colour	orange, red
Flowers	red, flowers in March
Fruits	red, inconspicuous
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	loamy soil, sandy soil, acid soil
Paving	tolerates partial paving
Winter hardiness zone	4 (-34,4 to -28,9 °C)
Wind resistance	bad
Other resistances	resistant to frost (WH 1 - 6)
Fauna tree	resistant to frost (WH 1 - 6), valuable for bees (honey plant)
Application	avenues and broad streets, narrow streets
Shape	clearstem tree

A somewhat older, American selection reaching circa 15 m. The crown is narrow pyramidal, making it a perfect tree for application in avenues. Young twigs are red-brown, the leaf stalk of the bright green 10 cm leaf is also red-brown. The underside of the palmate leaf is blue-green. Autumn colouring in orange-red hues. The red flowers emerge before the leaves unfurl. The tree develops a sturdy main root with fibrous root branches. In dry, limy soil the growth stunts and the autumn colouring will not occur. Intolerant to (sea) wind. 'Bowhall' shows a strong resemblance to *A. freemanii* 'Armstrong' but remains slightly shorter and has a more dense crown. The autumn colouring is more intense too. Winter hardiness zone: 4
