

# Acer tataricum HOT WINGS ( 'Garann' )

<b>Height</b>	4-6 m
<b>Width</b>	4-6m
<b>Crown</b>	round/spherical, dark, dense crown
<b>Bark and branches</b>	grey
<b>Leaf</b>	green
<b>Autumn colour</b>	yellow, orange, red
<b>Flowers</b>	white, flowers in May
<b>Fruits</b>	red
<b>Spines/thorns</b>	None
<b>Toxicity</b>	usually not toxic to people, (large) pets and livestock
<b>Soil type</b>	clayed soil, loamy soil, sandy soil, peaty soil, acid soil, all soil types
<b>Soil moisture</b>	suitable for dry soil
<b>Paving</b>	tolerates partial paving
<b>Winter hardiness zone</b>	3 (-40,0 to -24,5 °C)
<b>Wind resistance</b>	fairly to good
<b>Other resistances</b>	resistant to frost (WH 1 - 6), can withstand wind, resistant to de-icing salt
<b>Fauna tree</b>	resistant to frost (WH 1 - 6), can withstand wind, resistant to de-icing salt, valuable for bees (honey plant)
<b>Application</b>	tree containers, industrial areas
<b>Shape</b>	clearstem tree

Small but broad tree with a broad, virtually round crown. The leaves are 3-lobed, the middle lobe being significantly longer than the two side lobes. The leaves are bright green, turning yellowy orange to bright red in autumn. The fruits also turn bright red for several weeks as they ripen. This happens before the leaves change colour in autumn, so that the red fruits stand out attractively. Both the fruit and the autumn coloration benefit from a sunny location. A very hardy plant that flourishes on almost any soil type and is highly resistant to air pollution, drought and road salt.
