Flowers slender upright panicles, yellow red, June  Fruits smooth, light brown, irregular crop  Spines/thorns None	
Fruits smooth, light brown, irregular crop  Spines/thorns None	
Spines/thorns None	
<b>Toxicity</b> usually not toxic to people, (large) pets and livestock	
Soil type few requirements	
Paving tolerates no paving	
Winter hardiness zone 6b (-20,5 to -17,8 °C)	
Wind resistance bad	
Other resistances resistant to frost (WH 1 - 6)	
Fauna tree resistant to frost (WH 1 - 6), valuable for bees (honey plant)	
Shape clearstem tree	
Origin south-eastern of North America	
Origin south-eastern of North America	

This variety reaches a little bit higher than the species, but remains clearly smaller than the A. pavia 'Atrosanguinea'. Forms a tall shrub to average-sized tree with a round, thick crown. The lightly haired twigs have buds that are non-sticky. The underside of the short-stalked leaves is conspicuously grey-velvety haired. The topside is mat shiny and dark green. They reach up to 15 cm across and they have 5 leaflets, palmatifid-compound. The leaves are shed early in autumn. The yellow red flowers appear in upright panicles up to 20 cm in length. The tree thrives best in slightly moist soil. Good hardiness but susceptible to salt (for icy roads). Intolerant to hard surfaces.
