

Cydonia oblonga 'Vranja'

Height	3 - 5 m
Width	3-5m
Crown	round/spherical, dark, dense crown, capricious growing
Bark and branches	bark black-brown, young twigs have felt-like hair
Leaf	green
Autumn colour	yellow
Flowers	whitepink, flowers in May, fragrant flowers
Fruits	edible fruits, yellow
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, calcareous soil
Paving	tolerates no paving
Winter hardiness zone	5a (-28,8 to -26,1 °C)
Wind resistance	good
Other resistances	resistant to frost (WH 1 - 6), can withstand wind
Fauna tree	resistant to frost (WH 1 - 6), can withstand wind, valuable for butterflies
Application	tree containers, roof gardens, small gardens, patio gardens
Shape	clearstem tree, multi-stem treem, clearstem fruit tree, halfstem fruit tree

'Vranja' is a small tree with an almost round crown with a height of 3-5 m, in some cases higher (8 m). It is a moderately strong to vigorous grower whose stem branches grow quite horizontally. The young twigs are felt-like hairy and the old bark is black-brown. The ovoid to oval leaves are dark green and 10-12 cm in size. Flowering is around late April-early May, earlier than in the species. The flowers are white to soft pink and 4-5 cm in size. The edible fruits ripen around mid-October. These are pear-shaped, greenish-yellow to yellow and can grow larger than 10-12 cm. They are quite densely covered with felt hairs, making them soft to the touch. The productivity of 'Vranja' as a young tree is already regular and good to very good. Besides its good fruiting, this cultivar is little susceptible to mildew. However, 'Vranja' is susceptible to leaf fall disease. Hardiness zone 5a
