

Euonymus hamiltonianus 'Indian Summer'

Height	3 - 5 (10) m
Width	2-3m
Crown	round/spherical, dark, dense crown
Bark and branches	brown
Leaf	green
Autumn colour	red
Flowers	greenyellow, flowers in May
Fruits	orange, red, pink
Spines/thorns	None
Toxicity	has toxic components
Soil type	clayed soil, loamy soil, sandy soil, calcareous soil
Soil moisture	suitable for dry soil
Paving	tolerates no paving
Winter hardiness zone	5 (-28,8 to -23,4 °C)
Other resistances	resistant to frost (WH 1 - 6)
Application	tree containers, roof gardens, industrial areas, small gardens, patio gardens
Shape	clearstem tree

'Indian Summer' grows into a substantial shrub or small tree with a broad ovoid to round crown of 3-5 m in height, higher (10 m) under favourable growing conditions. It is a healthy, well-growing cultivar whose young twigs are light brownish-red and the old bark grey-brown and grooved. The oval-lanceolate leaves are mid-green and turn a beautiful deep red in autumn. This autumn colouring starts around mid-October and can last for almost two months. The green flowering is inconspicuous, but the dark pink fruits containing orange seeds are striking. Suitable for application to well-drained soils. Tolerates calcareous soil and tolerates drought. Slightly erratic growing small tree, suitable for use in gardens, parks and cemeteries.
