

Fagus sylvatica 'Miltonensis'

Height	8-12 m
Width	6-8m
Crown	broad weeping, dark, dense crown
Bark and branches	grey
Leaf	green
Autumn colour	yellow
Flowers	yellowgreen, flowers in May
Fruits	brown
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	loamy soil, sandy soil, peaty soil, calcareous soil
Paving	tolerates no paving
Winter hardiness zone	5b (-26,0 to -23,4 °C)
Wind resistance	moderate
Other resistances	resistant to frost (WH 1 - 6)
Shape	clearstem tree

Fagus sylvatica 'Miltonensis' is an uncommon medium-sized tree with slightly weeping branches. 'Miltonensis' can attain a height of 8 - 12 m. When maturing the older branches become more weeping, creating a very spreading crown, and requiring a lot of space. The habit is less regular than of 'Pendula'. The oval to round leaves are green and turn to brown yellow in autumn. Thrives well in calcareous, but moisture-retentive soil. The soil must be well-drained and rich in humus content. Winter hardiness zone: 5b
