

## Fagus sylvatica 'Rohanii'

<b>Height</b>	12-14 m
<b>Width</b>	8-12m
<b>Crown</b>	round/spherical, dark, dense crown
<b>Bark and branches</b>	grey
<b>Leaf</b>	reddisch brown, red
<b>Flowers</b>	yellowgreen, flowers in May
<b>Fruits</b>	brown
<b>Spines/thorns</b>	None
<b>Toxicity</b>	usually not toxic to people, (large) pets and livestock
<b>Soil type</b>	loamy soil, sandy soil, peaty soil, calcareous soil
<b>Paving</b>	tolerates no paving
<b>Winter hardiness zone</b>	5b (-26,0 to -23,4 °C)
<b>Wind resistance</b>	moderate
<b>Other resistances</b>	resistant to frost (WH 1 - 6)
<b>Application</b>	tree containers, roof gardens
<b>Shape</b>	clearstem tree, feathered tree

Fagus sylvatica 'Rohanii' is a relatively small beech with a compact round crown. Due to its slow growth it does not get taller than 12 - 14 m. The dark red-brown leaf unfolds bright red. It is oblong-ovate, irregular, moderately to deeply dissected with rounded lobes and unfolds circa one week earlier than F. sylvatica. The size of the leaf is 4 - 8 cm. Inconspicuous inflorescence followed by nutlets. Park tree or solitary. Prefers not too wet, well-drained soil, rich in humus content. Moderate wind resistance. Winter hardiness zone: 5b Fagus sylvatica 'Rohanii' is a relatively small beech. The emerging leaves are a bright red and appear a week earlier than those of the common beech.
