

## Juglans regia 'Broadview'

<b>Height</b>	15-20 m
<b>Width</b>	15-20m
<b>Crown</b>	round/spherical, half-open crown
<b>Bark and branches</b>	grey
<b>Leaf</b>	green, feathered leaf
<b>Flowers</b>	green, flowers in May
<b>Fruits</b>	edible fruits, brown
<b>Spines/thorns</b>	None
<b>Toxicity</b>	usually not toxic to people, (large) pets and livestock
<b>Soil type</b>	clayed soil, loamy soil, sandy soil, calcareous soil
<b>Paving</b>	tolerates no paving
<b>Winter hardiness zone</b>	5b (-26,0 to -23,4 °C)
<b>Wind resistance</b>	good
<b>Other resistances</b>	resistant to frost (WH 1 - 6), can withstand wind
<b>Application</b>	avenues and broad streets
<b>Shape</b>	clearstem tree, clearstem fruit tree

Juglans regia 'Broadview' is slower growing than the species and remains smaller. Height approx. 15 - 20 m. Suitable for smaller gardens. The shape of the crown, the trunk, the branches and leaves are identical to those of the species. After the emergence of the leaves the male and female flowers appear. They do not appear simultaneously. For this reason it is recommended that another cultivar, e.g. 'Buccaneer', should be planted close by to act as a pollinator. However fructification can be apomictic whereby solitary trees can also produce a reasonable quantity of fruit. Winter hardiness zone: 5b
