

Malus domestica 'Cox Orange Pippin'

Height	6-8 m
Width	6-8m
Crown	flattened spherical, open crown
Bark and branches	brown
Leaf	green
Flowers	white, pink, flowers in April
Fruits	edible fruits, greenish yellow, orange, red
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, acid soil
Paving	tolerates no paving
Winter hardiness zone	6 (-23,3 to -17,8 °C)
Wind resistance	good, susceptible to sea wind
Other resistances	resistant to frost (WH 1 - 6), can withstand wind
Fauna tree	resistant to frost (WH 1 - 6), can withstand wind, provides food for birds
Application	small gardens, patio gardens
Shape	clearstem tree, multi-stem treem, clearstem fruit tree, halfstem fruit tree

Malus 'Cox's Orange Pippin' is a strong-growing tree with a fairly wide, open crown. As a tree, this apple tree is unfortunately susceptible to mildew and slightly prone to scab. From mid-September to early October, the apples ripen. These are relatively small and slightly flattened round. Initially pale green, the apples turn greenish-yellow with a beautiful orange-red blush and broad stripes as they ripen. The flesh is quite firm and juicy. The flavour is pleasantly acidic and remarkably aromatic. 'Cox's Orange Pippin' is a very good hand apple, also suitable for juicing. Unsuitable for use in apple pie. Hardiness zone 6.
