

## Malus 'Profusion'

<b>Height</b>	6-7 m
<b>Width</b>	4-6m
<b>Crown</b>	broad ovoid, half-open crown
<b>Bark and branches</b>	brown
<b>Leaf</b>	green, purplegreen, reddisch brown
<b>Autumn colour</b>	red
<b>Flowers</b>	dark violetred, flowers in May
<b>Fruits</b>	red, purple/brown
<b>Spines/thorns</b>	None
<b>Toxicity</b>	usually not toxic to people, (large) pets and livestock
<b>Soil type</b>	clayed soil, loamy soil, sandy soil, acid soil, calcareous soil
<b>Paving</b>	tolerates paving
<b>Winter hardiness zone</b>	4 (-34,4 to -28,9 °C)
<b>Wind resistance</b>	good, susceptible to sea wind
<b>Other resistances</b>	resistant to frost (WH 1 - 6), can withstand wind
<b>Fauna tree</b>	resistant to frost (WH 1 - 6), can withstand wind, provides food for birds
<b>Application</b>	narrow streets, industrial areas, small gardens, patio gardens
<b>Shape</b>	clearstem tree, multi-stem treem

Malus 'Profusion' is a tree with a round, later ovoid crown with somewhat pendulous branches. Height 6 - 7 m. The purplish-green leaves measure 6 - 10 cm, are sometimes 3-lobed and take on a brownish-red colour in the autumn. Deep red flower buds give way to dark purple-red flowers. The flowers are single and approx. 4 cm in diameter. The fruits start out dark purple but later turn blood red and have a diameter of 1 - 1.5 cm. The tree can be used in streets and gardens. It makes heavy demands on the soil as regards moisture supply and fertility. 'Profusion' is sensitive to scab. Winter hardiness zone: 4
