

Malus 'Royalty'

Height	4 - 6 m
Width	4-6m
Crown	broad oval, half-open crown
Bark and branches	hairless, dark brown
Leaf	elliptical, dark purplish-brown, 6 - 8 cm
Flowers	purple-red, darker in the bud, single, May
Fruits	dark red, round, Ø up to 1.5 cm
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	nutritious, well drained soil
Paving	tolerates paving
Winter hardiness zone	4 (-34,4 to -28,9 °C)
Wind resistance	good, susceptible to sea wind
Other resistances	resistant to frost (WH 1 - 6), can withstand wind, resistant to de-icing salt
Fauna tree	resistant to frost (WH 1 - 6), can withstand wind, resistant to de-icing salt, provides food for birds
Application	industrial areas, small gardens, patio gardens
Shape	clearstem tree, multi-stem treem
Origin	W. L. Kerr, Sutherland, Canada, 1958

A Canadian selection with a broad-spreading crown. The branches spread out but later bend somewhat so the crown eventually becomes as broad as it is tall. The twigs and bark are hairless and dark brown. The purplish-brown leaves are very dark, making the flowering less remarkable. The purple-red flowers grow in bundles of 4 to 8 together. From late summer many large, spherical, dark red fruits, measuring up to 1.5 cm, appear on the tree. 'Royalty' can be used in parks, public gardens and gardens and stands up well to understory. Allowing a solitary planted shrub to grow into a multi-trunked tree can produce an attractive effect. The tree grows best in nutritious, not too dry soil. 'Royalty' is one of the prettiest dark-leaved ornamental apples trees but is unfortunately sensitive to scab.
