

Populus nigra 'Brandaris'

Height	15-20 m
Width	15-20m
Crown	oval, half-open crown
Bark and branches	grey
Leaf	green, brownish-green
Flowers	red, flowers in April
Fruits	green, inconspicuous
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, calcareous soil
Soil moisture	suitable for wet soil
Paving	tolerates no paving
Winter hardiness zone	4 (-34,4 to -28,9 °C)
Wind resistance	very good
Other resistances	resistant to frost (WH 1 - 6), can withstand wind, resistant to de-icing salt
Fauna tree	resistant to frost (WH 1 - 6), can withstand wind, resistant to de-icing salt, valuable for butterflies
Application	avenues and broad streets, coastal areas, industrial areas
Shape	clearstem tree

This tree forms a moderately broad, elongated, oval crown when young. Height up to approx. 20 m. The trunk has a tendency to grow bent at first and later to straighten out. This makes the trunk a little tortuous. The diamond-shaped leaves are green. They emerge brownish-green and turn yellowish-green in the autumn. Bears flowers in the form of male catkins. 'Brandaris' shows little sensitivity to leaf spot disease and canker. Its sensitivity to rust is variable. The tree is suitable for row planting, avenues, landscapes or urban areas. Also very suitable for planting in coastal regions. Grows best in nutritious moist soils. It is very resistant to wind. Winter hardiness zone: 4
