

Prunus *x*subhirtella 'Pendula' Plena Rosea'

Height	4 m
Width	4-5m
Crown	broad weeping, half-open crown
Bark and branches	brown, grey, reddish brown
Leaf	green
Autumn colour	yellow, orange
Flowers	light pink, flowers in April
Fruits	black, seldom
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, calcareous soil
Paving	tolerates no paving
Winter hardiness zone	5b (-26,0 to -23,4 °C)
Wind resistance	fairly
Other resistances	resistant to frost (WH 1 - 6)
Fauna tree	resistant to frost (WH 1 - 6), valuable for bees (honey plant)
Application	small gardens, patio gardens
Shape	clearstem tree, multi-stem tree

Prunus subhirtella 'Pendula Plena Rosea' is a slow-growing broad weeping form, usually grafted on tall stem. The main branches spread more or less horizontally, the young thin twigs are drooping. Decorative winter silhouette. Ultimate height circa 4 m. The green leaves are slightly narrower than those of the species. Flowers around mid-April. Can flower very richly but not equally richly every year. The buds and double flowers are dark pink, later light pink. Flower diameter approximately 2 cm. Does not tolerate wet soil. Hardiness zone: 5b
