

Prunus incisa 'February Pink'

Height	3-5 m
Width	3-5m
Crown	broad conical, half-open crown
Bark and branches	brown, grey
Leaf	green
Autumn colour	orange, red
Flowers	light pink, flowers in January
Fruits	purple/brown, black, little
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, peaty soil, all soil types
Paving	tolerates no paving
Winter hardiness zone	6b (-20,5 to -17,8 °C)
Wind resistance	moderate
Other resistances	resistant to frost (WH 1 - 6)
Fauna tree	resistant to frost (WH 1 - 6), valuable for bees (honey plant)
Application	small gardens, patio gardens
Shape	clearstem tree, multi-stem treem

Broad upright large shrub to small tree from 3 to 5 m. Initially grows quite vertically, but goes on to develop a broad pyramidal crown. The leaves are strikingly pointed and have a doubly serrated margin. In autumn the green leaf turns orange-red. 'February Pink' blossoms very early. In non-freezing conditions the very light pink flowers already open in January. The early blossoming time means the flowers and flower buds can freeze more easily. Bears few fruits which are purplish black and round. Loves fertile, moist soil and does not tolerate drought well.
