

Prunus incisa 'Mikinori'

Height	1,5-2,5 m
Width	1,5-2,5m
Crown	round/spherical, dark, dense crown
Bark and branches	brown, grey
Leaf	green
Autumn colour	red
Flowers	pink, white-blooming, flowers in April
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	all
Paving	tolerates no paving
Winter hardiness zone	6b (-20,5 to -17,8 °C)
Wind resistance	moderate
Other resistances	resistant to frost (WH 1 - 6)
Fauna tree	resistant to frost (WH 1 - 6), valuable for bees (honey plant)
Application	small gardens, patio gardens
Shape	clearstem tree, multi-stem tree

'Mikinori' is a fairly sturdy shrub with a broadly upright, later more rounded crown to over 2.5 m. The leaves are broadly elliptical, about 3.5 cm long and have a pointed tip. The leaf margin of the dark green leaves is coarsely double serrated. The leaves turn deep red in autumn. In the first half of April, the very pale pink flowers open and glow white, with purple-red calyxes standing out. The flower buds are darker pink. The flowers are about 2 cm in diameter and single to semi-double.

'Mikinori' was imported as an unnamed selection from Japan by the Boskoop Nursery Research Station in 1979. The plant flowers richly at a young age and proved to be an addition to the assortment. It was then decided to give the plant a cultivar name. In 1989, 'Mikinori' was introduced by the Research Station. Hardiness zone 6b.
