

Prunus incisa 'Paean'

Height	3-4 m
Width	2-3m
Crown	broad conical, half-open crown
Bark and branches	brown, grey
Leaf	green
Autumn colour	orange, red
Flowers	light pink, flowers in March-April
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	all
Paving	tolerates no paving
Winter hardiness zone	6b (-20,5 to -17,8 °C)
Wind resistance	moderate
Other resistances	resistant to frost (WH 1 - 6)
Fauna tree	resistant to frost (WH 1 - 6), valuable for bees (honey plant)
Application	small gardens, patio gardens
Shape	clearstem tree, multi-stem treem

'Paean' is a large shrub to small tree to about 4 m tall. The crown is broadly vase-shaped, eventually almost round and densely branched. The leaves are ovate with a serrate leaf edge and a pointed tip. When unfurling, the leaves are bronze-coloured, then turn dark green later in summer. In autumn, they turn deep orange-red. Full clusters of bright pink flowers open around the end of March and early April. The flower buds are slightly darker and the centre of the flowers also turn slightly darker when they unfurl. The, for a P. incisa dark flower colour is the main characteristic of 'Paean' and also forms its main ornamental value. Hardiness zone 6b.
