

## Prunus maackii

<b>Height</b>	8-12 m
<b>Width</b>	6-8m
<b>Crown</b>	broad ovoid, half-open crown
<b>Bark and branches</b>	flaking, yellowbrown, gold colour, orange
<b>Leaf</b>	green
<b>Autumn colour</b>	yellow, red
<b>Flowers</b>	white, flowers in April, fragrant flowers
<b>Fruits</b>	black
<b>Spines/thorns</b>	None
<b>Toxicity</b>	usually not toxic to people, (large) pets and livestock
<b>Soil type</b>	clayed soil, loamy soil, sandy soil, calcareous soil
<b>Paving</b>	tolerates partial paving
<b>Winter hardiness zone</b>	3 (-40,0 to -24,5 °C)
<b>Wind resistance</b>	moderate
<b>Other resistances</b>	resistant to frost (WH 1 - 6)
<b>Fauna tree</b>	resistant to frost (WH 1 - 6), provides food for birds
<b>Application</b>	avenues and broad streets, tree containers, roof gardens
<b>Shape</b>	clearstem tree, multi-stem treem

Fast-growing, medium-sized, semi-transparent tree with ascending branches. It forms an ovoid crown with a final height of 8 - 12 m. A remarkable feature is the golden-yellow flaky bark and old branches. The leaves are approx. 10 cm long, oval to narrow oval, with a pointed top and a finely serrated edge. The small fragrant white flowers appear in standing bunches in late April and early May. The tree does not produce many flowers. The flowers are followed by small black fruits. *Prunus maackii* does well as a park tree and does not prosper in wet soil. This tree is not often cultivated. Winter hardiness zone: 3 The trunk and old branches of *Prunus maackii* turn a warm golden-brown colour. This makes the tree a worthwhile solitary even in the winter.
