

Prunus serrulata 'Amanogawa'

Height	6 m
Width	1-1,5m
Crown	columnar, half-open crown
Bark and branches	twigs reddish brown, bark brown, smooth
Leaf	elongated to oval, fresh green, 7 - 12 cm, autumn colour orange
Autumn colour	orange
Flowers	light pink, semi-double, 3.5 - 4.5 cm, April/early May, fragrant flowers
Fruits	seldom
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	any: not in wet soils
Paving	tolerates paving
Winter hardiness zone	6a (-23,3 to -20,6 °C)
Wind resistance	fairly
Other resistances	resistant to frost (WH 1 - 6)
Application	avenues and broad streets, narrow streets, tree containers, small gardens, patio gardens
Shape	clearstem tree, feathered tree, multi-stem tree
Origin	Japan, 1830

Prunus serrulata 'Amanogawa' is a slow growing large shrub or small tree with a columnar crown that droops somewhat at a later stage. Height up to approx. 6 m. The twigs are reddish-brown and have few lenticels. The lanceolate to oval-shaped leaves have a tapered top and turn orange in the autumn. Produces many flowers from the end of April to early May. The pale pink semi-double flowers have a faint scent and turn white. Seldom produces fruit. For gardens, parks, streets and as a solitary. It does not stand up to wet soil. Winter hardiness zone: 6a
