

Sorbus latifolia 'Henk Vink'

Height	10-12 m
Width	6-10m
Crown	narrow conical, half-open crown
Bark and branches	grey
Leaf	green, white
Flowers	cream white, flowers in May
Fruits	yellow, orange, red, brown
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	loamy soil, sandy soil, nutrient-poor soil
Soil moisture	suitable for dry soil
Paving	tolerates paving
Winter hardiness zone	5a (-28,8 to -26,1 °C)
Wind resistance	good
Other resistances	resistant to frost (WH 1 - 6), can withstand wind
Fauna tree	resistant to frost (WH 1 - 6), can withstand wind, provides food for birds
Application	avenues and broad streets, narrow streets, industrial areas
Shape	clearstem tree

A good Sorbus latifolia selection with a faster growth rate and a narrow pyramidal crown. Height up to 12 m. The trunk is grey and rougher than that of the species: the young twigs are reddish-brown with white hairs. The broad, ovoid to almost round, sturdy, leathery leaves are glossy green and, on the underside, yellowish-green with felt-like hairs. The young emerging leaves also bear white felt-like hairs. The leaves are slightly more broadly serrated than those of the species. In late May the umbels of creamy white flowers appear. In the late summer numerous brownish-red to orange-yellow berries emerge. Fairly resistant to bacterial fire blight. Very resistant to wind. Winter hardiness zone: 5a
