

## Tilia platyphyllos 'Pyramidalis Aurea'

<b>Height</b>	15-20 m
<b>Width</b>	5-10m
<b>Crown</b>	oval, half-open crown
<b>Bark and branches</b>	grey
<b>Leaf</b>	yellow, yellow
<b>Flowers</b>	cream white, flowers in June, fragrant flowers
<b>Fruits</b>	green, grey
<b>Spines/thorns</b>	None
<b>Toxicity</b>	usually not toxic to people, (large) pets and livestock
<b>Soil type</b>	clayed soil, loamy soil, sandy soil, peaty soil, all soil types
<b>Paving</b>	tolerates partial paving
<b>Winter hardiness zone</b>	4 (-34,4 to -28,9 °C)
<b>Wind resistance</b>	good, susceptible to sea wind
<b>Other resistances</b>	resistant to frost (WH 1 - 6), can withstand wind
<b>Fauna tree</b>	resistant to frost (WH 1 - 6), can withstand wind, valuable for butterflies
<b>Application</b>	avenues and broad streets
<b>Shape</b>	clearstem tree, feathered tree

Large tree with an oval crown, 15 to 20 m. The branches grow steeply upwards. Initially the crown is columnar but eventually becomes oval. Young twigs are green and brownish red on the sunny side. The leaf emerges bright yellow, turning fresh greenish-yellow later in the summer. The underside is covered with soft grey-white hair. The flowers are in pendent corymbs and open in June and early July. They are cream-coloured, very fragrant and attract many bees. This ancient German cultivar spent a long time forgotten. Suitable for parks, avenues, streets and squares.
