

Magnolia ×soulangeana 'Satisfaction'

Height	2-3 m
Width	5-8m
Crown	wide oval to round , half-open crown, capricious growing
Bark and branches	brown, grey
Leaf	green
Flowers	white, purple-red, flowers in April-May
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, peaty soil, acid soil
Paving	tolerates no paving
Winter hardiness zone	6b (-20,5 to -17,8 °C)
Wind resistance	good
Other resistances	resistant to frost (WH 1 - 6), can withstand wind
Application	tree containers, roof gardens
Shape	multi-stem treem

Magnolia ×soulangeana 'Satisfaction', is a new cultivar within soulangeana. Its beautiful compact growth habit makes it an excellent choice for smaller gardens. The bicoloured bowl-shaped flowers that appear in April/May are deep pink outside and the inside is creamy white. Due to its later flowering, it is less likely to suffer frost damage than, for example, the stellata cultivars and will also bloom longer. The leaves are ovate to elliptical, mid-green. This magnolia does best in well-drained neutral to acidic soil. Hardiness: Zone 8b
