

## Ginkgo biloba 'Tremonia'

|                              |                                                                                            |
|------------------------------|--------------------------------------------------------------------------------------------|
| <b>Height</b>                | 10 - 12 m                                                                                  |
| <b>Width</b>                 | 3-4m                                                                                       |
| <b>Crown</b>                 | columnar to oval, light, open crown, capricious growing                                    |
| <b>Bark and branches</b>     | twigs light brown, bark grey-brown, later deeply grooved                                   |
| <b>Leaf</b>                  | in clusters of 3 - 5, fan-shaped, 7 - 10 cm long, green                                    |
| <b>Autumn colour</b>         | yellow                                                                                     |
| <b>Flowers</b>               | green, inconspicuous, April/May                                                            |
| <b>Fruits</b>                | none: male cultivar, fruitless cultivar                                                    |
| <b>Spines/thorns</b>         | None                                                                                       |
| <b>Toxicity</b>              | usually not toxic to people, (large) pets and livestock                                    |
| <b>Soil type</b>             | any                                                                                        |
| <b>Paving</b>                | tolerates paving                                                                           |
| <b>Winter hardiness zone</b> | 5a (-28,8 to -26,1 °C)                                                                     |
| <b>Wind resistance</b>       | fairly to good                                                                             |
| <b>Other resistances</b>     | resistant to frost (WH 1 - 6), can withstand wind                                          |
| <b>Application</b>           | avenues and broad streets, narrow streets, tree containers, roof gardens, industrial areas |
| <b>Shape</b>                 | clearstem tree, feathered tree, multi-stem treem, clearstem conifer, specimen conifer      |
| <b>Origin</b>                | Botanischer Garten Rombergpark, Dortmund, Germany, 1970                                    |

A column-shaped selection with a remarkably straight main stem and open branching. 'Tremonia' is slow-growing, especially when young, and remains very narrow, even when mature. Height 10 - 12 m. Width to approx. 5 m. The fan-shaped leaves and flower buds are on short shoots. The leaves grow in bundles of 3 - 5 together and have an incised top. Adding decorative value is the golden yellow colour this tree turns in autumn. 'Tremonia' is a male type that is excellently suited as a street tree, thanks to its lack of fruit. Its narrow crown renders it suitable for small gardens, as well. Requires a site with ample light. Winter hardiness zone: 5a
