Picea pungens 'Fat Albert'

3-5 m
3-5m
broad conical, dark, dense crown
grey, black
greygreen, bluegreen, evergreen
unremarkable, flowers in May
green, yellowbrown
None
usually not toxic to people, (large) pets and livestock
clayed soil, loamy soil, sandy soil, acid soil, calcareous soil
suitable for dry soil
tolerates no paving
4 (-34,4 to -28,9 °C)
resistant to frost (WH 1 - 6)
resistant to frost (WH 1 - 6), provides food for birds
tree containers, roof gardens, industrial areas, small gardens
clearstem tree, specimen conifer

Broad pyramidal small tree with a very dense and regular branching. This American cultivar grows into a compact tree, 3 to 5 m tall. The needles are intense light blue-grey, spiky, 2 - 3 cm long. The long cylindrical cones are green first, turning yellowish brown when ripening. Its very regular shape and good, compact growth habit make this cultivar very well suited to use in modern designs. Few demands as to soil, provided it is fertile enough and moist. Requires a sunny site. Requires slightly drier conditions than other Picea species and is resistant to urban climate and air pollution.
