

## Taxus baccata 'Overeynderi'

<b>Height</b>	3-4 m
<b>Width</b>	2-3m
<b>Crown</b>	ovoid / egg-shaped, dark, dense crown
<b>Bark and branches</b>	flaking, reddish brown
<b>Leaf</b>	green, evergreen
<b>Flowers</b>	yellow, flowers in April
<b>Fruits</b>	fruitless cultivar
<b>Spines/thorns</b>	None
<b>Toxicity</b>	usually not toxic to people, (large) pets and livestock
<b>Soil type</b>	clayed soil, loamy soil, sandy soil, acid soil, calcareous soil
<b>Paving</b>	tolerates no paving
<b>Winter hardiness zone</b>	6b (-20,5 to -17,8 °C)
<b>Wind resistance</b>	good
<b>Other resistances</b>	resistant to frost (WH 1 - 6), can withstand wind
<b>Fauna tree</b>	resistant to frost (WH 1 - 6), can withstand wind, provides food for birds
<b>Application</b>	tree containers, roof gardens, industrial areas, small gardens
<b>Shape</b>	specimen conifer

Good, wide upright growing cultivar with a regular ovoid crown, up to 3 to 4 m. This Taxus is very densely branched with brown twigs. Old bark is brown-red and flaking. At 2 cm long the needles are relatively short. They are about 0.2 cm wide and mid-green. Although 'Overeynderi' usually blossoms abundantly, the blossom is male so it does not produce any fruit. The tree bears some resemblance to 'Major' and 'Pyramidalis' but it has denser branching and a regular crown shape. Extremely suitable for parks and gardens and can also be used as a hedge. Created in 1923 as seedling of 'Fastigiata'.
