

Castanea sativa 'Albomarginata'

Height	20-25 m
Width	15-20m
Crown	round/spherical, dark, dense crown
Bark and branches	grey
Leaf	variegated, off white/ green
Flowers	cream white, flowers in June, fragrant flowers
Fruits	edible fruits, brown
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, peaty soil, acid soil
Paving	tolerates no paving
Winter hardiness zone	6a (-23,3 to -20,6 °C)
Wind resistance	good
Other resistances	resistant to frost (WH 1 - 6), can withstand wind
Fauna tree	resistant to frost (WH 1 - 6), can withstand wind, valuable for butterflies
Shape	clearstem tree

A large tree, approx. 25 m tall, with an irregular crown up to 20 m wide. The heavy, squat, dark grey trunk twists on its axis taking the deep grooves in the bark with it. Young branches are olive-green but quickly turn reddish-brown. The elongated leaf is glossy and has a remarkable and regular cream-coloured to white leaf edge that is clearly serrated. Young leaves carry velvety hairs on the underside. The flowers are the same as those of the species. The spikes on the fruit husks are sometimes also partially white. The fruit is edible. 'Albomarginata' puts down a deep and widespread root system. Winter hardiness zone: 6a
