

Fraxinus excelsior 'Nana'

| | |
|------------------------------|--|
| Height | 4-6 m |
| Width | 3-5m |
| Crown | round/spherical, half-open crown |
| Bark and branches | brown, grey |
| Leaf | green, feathered leaf |
| Flowers | none |
| Fruits | fruitless cultivar |
| Spines/thorns | None |
| Toxicity | usually not toxic to people, (large) pets and livestock |
| Soil type | clayed soil, loamy soil, sandy soil, calcareous soil |
| Soil moisture | suitable for wet soil, withstand short flood |
| Paving | tolerates partial paving |
| Winter hardiness zone | 4 (-34,4 to -28,9 °C) |
| Wind resistance | good |
| Other resistances | resistant to frost (WH 1 - 6), can withstand wind, resistant to de-icing salt |
| Application | narrow streets, tree containers, roof gardens, coastal areas, industrial areas, small gardens, patio gardens |
| Shape | clearstem tree |

Fraxinus excelsior 'Nana' is a shrub, sometimes grafted on a standard or half-standard of F. excelsior. As a tree it can attain a height of 4 - 6 m. The crown is spherical and very open, which is why it has never become popular. The bark is grey brown. The compound, dark-green leaf is odd-pinnate, 15 - 20 cm large and has 9 - 11 leaflets that are slightly smaller than of the F. excelsior. It has no flowers or fruits. 'Nana' is applied as a decorative shrub in (small) gardens, little squares and narrow streets with wide green verges. It prefers moist, nutritive soil. Winter hardiness zone: 4
