

Hamamelis ×intermedia 'Pallida'

Height	4-5 m
Width	4-5m
Crown	broad vase-shaped, half-open crown, capricious growing
Bark and branches	brown
Leaf	green
Autumn colour	yellow
Flowers	yellow, flowers in December, fragrant flowers
Fruits	brown
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	loamy soil, sandy soil, peaty soil, acid soil
Paving	tolerates no paving
Winter hardiness zone	6b (-20,5 to -17,8 °C)
Wind resistance	moderate
Other resistances	resistant to frost (WH 1 - 6)
Application	tree containers, small gardens, patio gardens
Shape	clearstem tree, multi-stem treem

Vigorous, sturdy shrub to small tree about 3 m high and 4 m wide, with a broad, fan-shaped growth pattern and a semi-open crown. The slightly glossy mid-green leaf turns yellow in autumn. The very profuse blossoming occurs in December/January. The flowers measure about 4 cm and are an intense sulphur yellow. They have a strong, very pleasant fragrance and the plant blossoms profusely every year. The exact origin of 'Pallida' is unknown, but the plant was named in 1958 at RHS Wisley Garden, UK. 'Pallida' is the best known yellow-flowering cultivar and generally regarded as one of the best Hamamelis cultivars.
