

## Hamamelis japonica 'Pendula'

<b>Height</b>	3 m
<b>Width</b>	2-3m
<b>Crown</b>	broad weeping, light, open crown, capricious growing
<b>Bark and branches</b>	brown, grey
<b>Leaf</b>	green, yellowgreen
<b>Autumn colour</b>	yellow
<b>Flowers</b>	light yellow, flowers in February
<b>Spines/thorns</b>	None
<b>Toxicity</b>	usually not toxic to people, (large) pets and livestock
<b>Soil type</b>	loamy soil, sandy soil, peaty soil, acid soil
<b>Paving</b>	tolerates no paving
<b>Winter hardiness zone</b>	6b (-20,5 to -17,8 °C)
<b>Wind resistance</b>	moderate
<b>Other resistances</b>	resistant to frost (WH 1 - 6)
<b>Application</b>	tree containers, small gardens, patio gardens
<b>Shape</b>	clearstem tree, feathered tree

Broad, weeping shape with an irregular habit and very pendulous branches. This Japanese cultivar grows naturally as a shrub, attaining a height of about 1 m and a width of 3 m. If the central leader is grown with stake support, the tree can grow several metres high. The sprouting leaf is light yellow-green, turning slightly glossy dark green in summer and buttery yellow in autumn. Blossoms around February/March with pendent, light yellow flowers measuring about 2 cm. They have a slight fragrance. 'Pendula' is the only Hamamelis with a weeping growth pattern and flowers of any decorative value.
