

Magnolia 'Seven Sisters'

Height	4-5 m
Width	4-5m
Crown	round/spherical, dark, dense crown, capricious growing
Bark and branches	brown, grey
Leaf	green
Flowers	dark pink, flowers in April
Fruits	redgreen
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, peaty soil, acid soil
Paving	tolerates partial paving
Winter hardiness zone	6 (-23,3 to -17,8 °C)
Wind resistance	moderate
Other resistances	resistant to frost (WH 1 - 6)
Application	tree containers, small gardens
Shape	clearstem tree, multi-stem treem

'Seven Sisters' is a small tree with a slightly irregularly shaped, broadly oval crown, which becomes almost round in later life. Eventually, 'Seven Sisters' grows 4-5 m tall and the crown becomes almost as wide. It is a deciduous hybrid with healthy, dark green leaves in summer. The dark pink flowers open in April. When opening, they are broadly bowl-shaped, but soon the petals flatten out to form a more or less star-shaped flower. The petals are relatively narrow, giving the flowers an airy character. Even at a young age, 'Seven Sisters' flowers richly. Was introduced by Van den Berk Nurseries. Hardiness zone 6.
