

Malus domestica 'Gelber Bellefleur'

Height	6-8 m
Width	6-8m
Crown	round/spherical, flatened spherical, half open crown
Bark and branches	brown
Leaf	green
Flowers	white, pink, flowers in April
Fruits	edible fruits, yellow, red
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, acid soil
Paving	tolerates no paving
Winter hardiness zone	6 (-23,3 to -17,8 °C)
Wind resistance	good, susceptible to sea wind
Other resistances	resistant to frost (WH 1 - 6), can withstand wind
Fauna tree	resistant to frost (WH 1 - 6), can withstand wind, provides food for birds
Application	small gardens, patio gardens
Shape	clearstem tree, clearstem fruit tree, halfstem fruit tree

Malus domestica 'Gelber Bellefleur' is a medium-growing tree with a semi-open, broadly vase-shaped to almost round crown. Its final height will be around 6-8 m. The blossom, in April, is bright pink, an additional ornamental value of this consumption apple. It is a late ripening apple that cannot be picked until October. The apples are large and cone-shaped. The colour is yellow, usually with a red blush. The flesh is medium firm. The taste is pleasantly sweet-sour and aromatic. 'Gelber Bellefleur' is a versatile apple, suitable as a hand apple as well as in dishes and in apple pie. Although this cultivar is popularly called 'Bellefleur', the correct name is 'Gelber Bellefleur'. Hardiness zone 6.
