

Malus domestica 'Kaiser Wilhelm'

Height	5-8 m
Width	5-8m
Crown	oval, half-open crown
Bark and branches	brown
Leaf	green
Flowers	pink, flowers in April
Fruits	edible fruits, yellow, red
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, acid soil
Paving	tolerates no paving
Winter hardiness zone	6 (-23,3 to -17,8 °C)
Wind resistance	good, susceptible to sea wind
Other resistances	resistant to frost (WH 1 - 6), can withstand wind
Fauna tree	resistant to frost (WH 1 - 6), can withstand wind, provides food for birds
Application	small gardens, patio gardens
Shape	clearstem tree, clearstem fruit tree, halfstem fruit tree

'Kaiser Wilhelm' is a medium-sized apple tree that grows moderately fast. The crown is semi-open and oval in shape. The tree will grow (5)6-8 m tall. The flower buds are dark pink and the flowers, which open in April, are light pink. Apples can be picked from around mid-September. These are regular in shape, medium-sized and round to slightly elongated. The colour is greenish-yellow to golden yellow with a large red blush on the sunny side. The flesh is yellowish-white, very juicy and pleasantly aromatic. 'Kaiser Wilhelm' can be used as a hand apple, but it also keeps for a long time and is therefore versatile. The apples are not very prone to bruising and can be used for purée, pies or as a cooking apple. This makes this cultivar fine for use in private gardens. 'Kaiser Wilhelm' was found in Germany around 1864. Hardiness zone 6.
