

Malus domestica 'Keuleman'

Height	5-8 m
Width	5-8m
Crown	round/spherical, half-open crown
Bark and branches	brown, grey
Leaf	green
Flowers	white, flowers in May
Fruits	edible fruits, green, red
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, acid soil
Paving	tolerates no paving
Winter hardiness zone	6 (-23,3 to -17,8 °C)
Wind resistance	good, susceptible to sea wind
Other resistances	resistant to frost (WH 1 - 6), can withstand wind
Fauna tree	resistant to frost (WH 1 - 6), can withstand wind, provides food for birds
Application	small gardens, patio gardens
Shape	clearstem tree, clearstem fruit tree

'Keuleman' is a medium-sized apple tree that grows moderately fast. The semi-open, round crown grows (5)6-8 m tall. The white-pink flowers open in May. The flower buds are light pinkish-red. The apples are ready for picking late in the season, around the end of October to mid-November. They are regular in shape, round and small to medium in size. The colour is green with a carmine blush and streaks. The yellowish-white flesh is firm, quite dry and has hardly any aroma. The flavour is acidic. 'Keuleman' is a pronounced storage apple. The name is probably a corruption of 'kuileman', referring to the fact that apples used to be ensiled, like potatoes. Not recommended as a hand apple, but all the more so as a cooking/boiling apple.

This cultivar probably originated in Germany. Hardiness zone 6.
