

## Morus alba 'Nana Issai'

<b>Height</b>	3,5 m
<b>Width</b>	3-4m
<b>Crown</b>	round/spherical, half-open crown
<b>Bark and branches</b>	grey
<b>Leaf</b>	green
<b>Flowers</b>	green, flowers in May-June, inconspicuous bloom
<b>Fruits</b>	edible fruits, red, inconspicuous
<b>Spines/thorns</b>	None
<b>Toxicity</b>	usually not toxic to people, (large) pets and livestock
<b>Soil type</b>	clayed soil, loamy soil, sandy soil, peaty soil, nutrient-poor soil, all soil types
<b>Soil moisture</b>	suitable for dry soil
<b>Paving</b>	tolerates no paving
<b>Winter hardiness zone</b>	5a (-28,8 to -26,1 °C)
<b>Wind resistance</b>	fairly to good
<b>Other resistances</b>	resistant to frost (WH 1 - 6)
<b>Application</b>	tree containers, small gardens, patio gardens
<b>Shape</b>	clearstem tree

Morus alba 'Nana Issai' is a small tree with a round crown. The crown is naturally quite open and if a denser crown is desired, corrective pruning should be carried out. 'Nana Issai' grows about 3.5 m high, but as the tree is usually grafted on a tall stem, a small trunk tree is created. The green leaves do not produce autumn colours, nor is flowering very conspicuous. The fruits (mulberries), on the other hand, are attractive. Not because they are hugely conspicuous, but because they are edible. So it is a female cultivar.

'Nana Issai' is an easy tree that grows on all soil types. The tree tolerates a lot of heat and dry soil. Suitable for small-scale uses such as parks, squares and (private) gardens. Hardiness zone 5a.
