

Platanus ×hispanica 'Tremonia'

Height	15 - 20 m
Width	5-10m
Crown	pyramidal, half-open crown
Bark and branches	bark grey-green, scaling yellow-green
Leaf	palmately lobed with 3 - 5 lobes, green
Flowers	spherical heads, yellow-green, May
Fruits	spherical, spiky, brown, usually in pairs
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	all, soil not too limy
Paving	tolerates paving
Winter hardiness zone	6a (-23,3 to -20,6 °C)
Wind resistance	moderate to good
Other resistances	resistant to frost (WH 1 - 6), resistant to de-icing salt
Application	avenues and broad streets, narrow streets
Shape	clearstem tree
Origin	Botanischer Garten Rombergpark, Dortmund, Germany, 1951
Synonyms	Platanus × acerifolia 'Tremonia'

A German selection with a pyramidal crown and a vertical main trunk. Height 15 - 20 m. It is characterised by the flaking bark with a light green to yellow-green underground, and grey-green, dark green or brown pieces that flake off. The broad palmate lobed leaf has 3 - 5 sharply serrated lobes and is slightly hairy on the underside. In the autumn the leaves turn colour to a brownish yellow. Fallen leaves do not rot easily and remain on the ground around the tree. Plane trees are very resistant to hard surfaces but surface roots can push the surrounding paving upwards. Takes pruning very well, even in old wood. Saplings are sensitive to frost and need a tree stake for support. Winter hardiness zone: 6a
