Populus ×canadensis 'Spijk'

| Height | 20-25 m, fast growing |
|-----------------------|---|
| Width | 15-20m |
| Crown | broad ovoid, half-open crown |
| Bark and branches | brown, grey |
| Leaf | green |
| Flowers | red, flowers in April |
| Fruits | fruitless cultivar |
| Spines/thorns | None |
| Toxicity | usually not toxic to people, (large) pets and livestock |
| Soil type | clayed soil, loamy soil, sandy soil |
| Paving | tolerates paving |
| Winter hardiness zone | 4 (-34,4 to -28,9 °C) |
| Wind resistance | fairly |
| Other resistances | resistant to frost (WH 1 - 6) |
| Application | avenues and broad streets, coastal areas |
| Shape | clearstem tree |

This Dutch selection has a broad crown with a straight to somewhat tortuous trunk. When young the tree is still fairly narrow and grows loosely. Young bark is light coloured. The dark green leaves are diamond-shaped to triangular and often have a red leaf stalk. In the autumn the leaves turn yellowish-green. The tree bears male catkins as flowers. 'Spijk' is little sensitive to leaf spot disease but is certainly sensitive to rust and canker. The tree is reasonably wind-resistant. Can be used in landscape and urban settings. In coastal regions it is used as a forestry tree. It prefers fertile moist soil. Winter hardiness zone: 4
