

## Populus ×canescens 'Enniger'

|                              |                                                                               |
|------------------------------|-------------------------------------------------------------------------------|
| <b>Height</b>                | 20-25 m                                                                       |
| <b>Width</b>                 | 15-20m                                                                        |
| <b>Crown</b>                 | oval, half-open crown                                                         |
| <b>Bark and branches</b>     | brown, grey                                                                   |
| <b>Leaf</b>                  | green                                                                         |
| <b>Flowers</b>               | greycree, flowers in March                                                    |
| <b>Fruits</b>                | fruitless cultivar                                                            |
| <b>Spines/thorns</b>         | None                                                                          |
| <b>Toxicity</b>              | usually not toxic to people, (large) pets and livestock                       |
| <b>Soil type</b>             | clayed soil, loamy soil, sandy soil, acid soil, calcareous soil               |
| <b>Soil moisture</b>         | suitable for wet soil                                                         |
| <b>Paving</b>                | tolerates paving                                                              |
| <b>Winter hardiness zone</b> | 5a (-28,8 to -26,1 °C)                                                        |
| <b>Wind resistance</b>       | very good                                                                     |
| <b>Other resistances</b>     | resistant to frost (WH 1 - 6), can withstand wind, resistant to de-icing salt |
| <b>Application</b>           | coastal areas                                                                 |
| <b>Shape</b>                 | clearstem tree                                                                |

Originates from Berlin Zoo from where it was taken to Enniger, Westphalia. Forms a straight trunk that often forks. When young it has a narrow crown but this becomes broader and rounder at a later stage. The triangular to ovoid leaves are glossy dark green and have a grey underside. The leaf edge is lobed or roughly serrated. 'Enniger' bears flowers in the form of male catkins. Little sensitive to rust but sensitive to canker. Grows in all types of soil. The tree is suitable for landscapes and coastal areas but also as a solitary in public gardens and parks. Very resistant to wind. Winter hardiness zone: 5a
