

Populus ×canescens 'Witte van Haamstede'

Height	20-25 m
Width	15-20m
Crown	oval, half-open crown
Bark and branches	grey
Leaf	green
Flowers	grey, flowers in March
Fruits	fruitless cultivar
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, acid soil, calcareous soil
Soil moisture	suitable for wet soil, withstand short flood, withstand long flood
Paving	tolerates paving
Winter hardiness zone	5a (-28,8 to -26,1 °C)
Wind resistance	very good
Other resistances	resistant to frost (WH 1 - 6), can withstand wind, resistant to de-icing salt
Application	coastal areas
Shape	clearstem tree

A selection from the 'De Dorschkamp' experimental forestry station in Wageningen (NL). It forms a regular, oval to broad pyramidal crown. The bark is grey. The leaves are triangular to ovoid and dull green in colour. The leaf edge is lobed to roughly serrated. Bears flowers in the form of female catkins. Little sensitive to rust but very sensitive to canker. 'Witte van Haamstede' can be used for landscapes and in row planting. Is very resistant to wind and salt. Winter hardiness zone: 5a
