

Prunus ×persicoides

Height	4-6 m
Width	6-8m
Crown	round/spherical, half-open crown
Bark and branches	brown, grey
Leaf	green
Flowers	pink, white, flowers in March
Fruits	edible fruits
Spines/thorns	Yes
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	clayed soil, loamy soil, sandy soil, calcareous soil
Soil moisture	suitable for wet soil
Paving	tolerates no paving
Winter hardiness zone	6a (-23,3 to -20,6 °C)
Wind resistance	fairly
Other resistances	resistant to frost (WH 1 - 6)
Fauna tree	resistant to frost (WH 1 - 6), valuable for bees (honey plant)
Application	tree containers, small gardens, patio gardens
Synonyms	Prunus ×amygdalopersica

Small tree with a round, loose crown and a height about 4 - 6 m. The twigs on the sunny side are brownish-red and sometimes thorny. The green leaves are lanceolate and 7 - 12 cm long, with a pointed tip and the leaf edge is finely serrated. An early-flowering cultivar that flowers in March and April. The flowers are 3 - 5 cm in size and turn from pink to almost white. They are single or arranged with 2 flowers together. Forms edible, peachy fruits. Solitary for parks and gardens. Prefers moist soil and a fairly sunny position. Reasonably resistant to wind. Hardiness zone: 6a
