

## Prunus armeniaca 'Tros Oranje'

<b>Height</b>	4-6 m
<b>Width</b>	3-5m
<b>Crown</b>	flatened spherical, half-open crown
<b>Bark and branches</b>	brown
<b>Leaf</b>	green
<b>Flowers</b>	white, pink, flowers in March-April
<b>Fruits</b>	edible fruits, yellow, orange
<b>Spines/thorns</b>	None
<b>Toxicity</b>	usually not toxic to people, (large) pets and livestock
<b>Soil type</b>	clayed soil, loamy soil, sandy soil, calcareous soil
<b>Paving</b>	tolerates no paving
<b>Winter hardiness zone</b>	6a (-23,3 to -20,6 °C)
<b>Wind resistance</b>	fairly to good
<b>Other resistances</b>	resistant to frost (WH 1 - 6)
<b>Fauna tree</b>	resistant to frost (WH 1 - 6), valuable for bees (honey plant)
<b>Application</b>	tree containers, small gardens, patio gardens
<b>Shape</b>	clearstem tree, clearstem fruit tree

'Truss Orange' is an apricot tree with a semi-open, flattened spherical crown. The tree grows 4-6 m tall. The tree flowers around mid-March to early April. The flowers are very light pink to almost white. The apricots are relatively small, making them easier to ripen in the temperate and maritime climate of north-western Europe. The fruits ripen in August and can be used both for direct consumption and for storage. The smaller fruit size makes apricots very suitable for storage. The skin is deep yellow to light orange and the flesh is firm and tastes pleasantly sweet. 'Truss Orange' is a self-pollinating variety and generally produces a lot of fruit, which also makes it popular with consumers. Cross-pollination with other trees will only enhance production. Hardiness zone 6a.
