

## Quercus ×hispanica 'Diversifolia'

<b>Height</b>	5-8 m
<b>Width</b>	5-8m
<b>Crown</b>	flatened spherical, half-open crown
<b>Bark and branches</b>	grey
<b>Leaf</b>	evergreen
<b>Flowers</b>	light yellow, flowers in April
<b>Fruits</b>	brown
<b>Spines/thorns</b>	None
<b>Toxicity</b>	usually not toxic to people, (large) pets and livestock
<b>Soil type</b>	loamy soil, sandy soil, calcareous soil
<b>Soil moisture</b>	suitable for wet soil
<b>Paving</b>	tolerates no paving
<b>Winter hardiness zone</b>	7 (-17,7 to -12,3 °C)
<b>Wind resistance</b>	good
<b>Other resistances</b>	can withstand wind, resistant to de-icing salt
<b>Application</b>	industrial areas
<b>Shape</b>	clearstem tree, feathered tree

Semi-evergreen to full evergreen tree, 5 to 8 m tall, with a round to flat-topped spherical crown. The thick bark is dark grey, deeply grooved and highly corky. The ovate leaves have a very variable margin. A characteristic of this cultivar is that the leaves have a half-moon shaped dissection in the middle. There may be several small lobes above and below this dissection. Fruit is the same as the species. During severe cold, the leaves turn brown in the winter, only falling when the new leaves emerge. A healthy, warmth-loving tree which prefers a limy soil.
