

Quercus ×hispanica 'Fulhamensis'

Height	12-15 m
Width	10-12m
Crown	round/spherical, half-open crown
Bark and branches	grey
Leaf	evergreen
Flowers	light yellow, flowers in April
Fruits	brown
Spines/thorns	None
Toxicity	usually not toxic to people, (large) pets and livestock
Soil type	loamy soil, sandy soil, calcareous soil
Soil moisture	suitable for wet soil
Paving	tolerates no paving
Winter hardiness zone	7 (-17,7 to -12,3 °C)
Wind resistance	good
Other resistances	can withstand wind, resistant to de-icing salt
Application	industrial areas
Shape	clearstem tree, feathered tree, multi-stem treem

A semi-evergreen to full evergreen tree growing to 12 - 15 m. The red crown has gracefully hanging twigs which are thinner than other cultivars of Q. x hispanica. The thick bark is dark grey, deeply grooved and corky. The leaves are dark green on top whereas the underside has grey-white hairs. The blossom and fruit are the same as on the species. During severe cold, the leaves turn brown in the winter, only falling when the new leaves emerge. A healthy, warmth-loving tree which prefers a limy soil. There are a few types in circulation with the same name.
