

## Tilia tomentosa 'Doornik'

<b>Height</b>	25 m
<b>Width</b>	12-15m
<b>Crown</b>	broad conical, half-open crown
<b>Bark and branches</b>	grey
<b>Leaf</b>	green, greygreen
<b>Autumn colour</b>	yellow
<b>Flowers</b>	yellow, flowers in July, fragrant flowers
<b>Fruits</b>	green, grey
<b>Spines/thorns</b>	None
<b>Toxicity</b>	usually not toxic to people, (large) pets and livestock
<b>Soil type</b>	clayed soil, loamy soil, sandy soil, peaty soil, all soil types
<b>Soil moisture</b>	suitable for dry soil
<b>Paving</b>	tolerates paving
<b>Winter hardiness zone</b>	6a (-23,3 to -20,6 °C)
<b>Wind resistance</b>	tolerates (sea) wind
<b>Other resistances</b>	resistant to frost (WH 1 - 6)
<b>Fauna tree</b>	resistant to frost (WH 1 - 6), valuable for butterflies
<b>Application</b>	avenues and broad streets, tree containers, roof gardens, coastal areas, industrial areas
<b>Shape</b>	clearstem tree

An old Belgian cultivar with a broad, ovoid crown that is not as tight as that of 'Brabant'. 'Doornik' has a good, straight main branch on which upwards-slanting branches grow. Height approx. 25 m, width approx. 15 m. The smooth trunk is dark grey: young twigs are greenish grey and felt-like. The leaves are more or less round, dark matt green with a remarkably thick white felty underside. In the autumn they turn light yellow and stay on the tree for a long time. In July, pendulous umbels of strongly aromatic flowers appear. 'Doornik' is used often as a city tree thanks to its uniform manner of growth. Fairly unsusceptible to aphids. Winter hardiness zone: 6a
