## Tilia tomentosa 'Varsaviensis'

| Height                | 20-25 m   |
|-----------------------|---|
| Width                 | 8-10m   |
| Crown                 | narrow conical, half-open crown   |
| Bark and branches     | grey  |
| Leaf                  | green, greygreen  |
| Autumn colour         | yellow  |
| Flowers               | yellow, flowers in July, fragrant flowers   |
| Fruits                | grey, inconspicuous   |
| Spines/thorns         | None  |
| Toxicity              | usually not toxic to people, (large) pets and livestock                                   |
| Soil type             | clayed soil, loamy soil, sandy soil, peaty soil, all soil types                           |
| Soil moisture         | suitable for dry soil   |
| Paving                | tolerates paving  |
| Winter hardiness zone | 6a (-23,3 to -20,6 °C)  |
| Wind resistance       | tolerates (sea) wind  |
| Other resistances     | resistant to frost (WH 1 - 6)   |
| Fauna tree            | resistant to frost (WH 1 - 6), valuable for butterflies                                   |
| Application           | avenues and broad streets, tree containers, roof gardens, coastal areas, industrial areas |
| Shape                 | clearstem tree  |
|                       |   |

A Polish cultivar with a fairly narrow, pyramidal crown. The tree has a good, straight main branch on which upwards-slanting branches grow. Height 20 - 25 m, width approx. 8 - 10 m. The smooth trunk is dark grey: young twigs are greenish grey and felt-like. The leaves are more or less round, dark matt green with a remarkably thick white felty underside. In the autumn they turn light yellow and stay on the tree for a long time. In July, pendulous umbels of strongly aromatic flowers appear. 'Varsaviensis' is a good avenue and street tree thanks to its uniform, relatively narrow manner of growth. Fairly unsusceptible to aphids. Winter hardiness zone: 6a
